teamjoinery.com

Create a world where **Hiring** is

**Instant.
Seamless.
Foolproof.**

Our Mission

Why now?

Hiring is a **slow, error-prone** process, and it's only getting **worse**.

Company cultures are in **turmoil**

The upheaval of COVID-19, the rise of remote work, and the rapid advancement of AI are driving new professional norms.

Hiring tech is **outdated**

Applicant Tracking Systems are digitized classified ads and paper folders, they don't leverage big data and natural language processing.

Bad hires cost companies up to **30%** of the employee's first-year salary

Employee turnover can cost **1.5x** the employee's annual salary

In 2022, employee turnover affected **50.6 million workers** - **70%** of all job separations

\$31.37 billion

2023 online recruitment market

VS

\$474.61 billion

2023 Global recruitment market

Half of a trillion dollars is spent on recruitment professionals, when software could do the same job **better, faster, and cheaper.**

**Joinery is cutting-edge recruiting intelligence,
proactively matching candidates to jobs
faster and more accurately
than humans.**

Our Solution

We're a team that knows
success and **innovation**.

40 Years
Leadership & Team Building

Leadership

Nick Hertzman | CEO

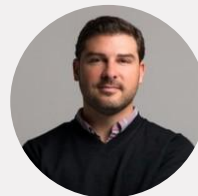

Startup leader with a history of successful early stage ventures. Skilled in strategic marketing and scaling companies from the ground up.

Jordan Koszarek | CTO

Engineering leader with early-stage startup and public company success. Expert in bridging the gap between startup agility and corporate scale.

Advisors

Brian Saab | Strategy

Veteran startup architect with three successful exits. Combines entrepreneurial zeal with strategic execution, having navigated multiple ventures from inception to acquisition.

The Roadmap

2024

Resume Screener

Effortlessly screen resumes with quick, insightful candidate snapshots.

Free Beta

2025

Candidate Engagement Platform

Revolutionize candidate interactions with AI-powered engagement tools.

\$3.1 Billion TAM

2026

Next Gen ATS

Transform recruitment efficiency with a automated, intuitive, and advanced applicant tracking system that adapts to your needs.

\$6.3 Billion TAM

2027

Candidate Matching Database

Use machine learning with our proprietary DB to match candidates with job descriptions, achieving our vision of instant, seamless, and foolproof hiring.

\$31.3 Billion TAM

We're quickly building a next-gen ATS that will easily capture significant market share, develop a robust candidate database, and ultimately challenge LinkedIn's dominance in the recruiting space.

Joinery ATS:

Reinventing Recruitment for the Modern Era

Candidate Engagement

A seamless Large Language Model (LLM) that automatically communicates with candidates over email, asking questions about their applications and keeping them informed about the hiring process.

Culture and Fit Profiles

Real-time scoring and analytics that dive deep into a candidate's alignment with a company's values and culture, guiding hiring managers to the best team fits.

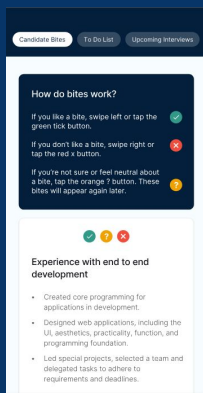

AI Hiring Assistant

A natural language interface that provides hiring managers with comprehensive details about their candidate pool and allows them to manage the entire pipeline efficiently.

Hiring Transparency

Track and record every interview and interaction, ensuring unparalleled transparency. Promote collaboration in decision-making, reduce mis-hires, and enhance long-term retention.

The Progress

Over 40 sign-ups across two MVP versions; rapidly deployed and iterated over 5 months based on user feedback.

Beta User Growth and Feedback

Closed Beta of MVP V2
May 2024

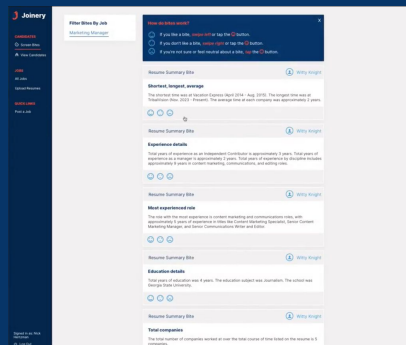

Integrations with both Greenhouse and Lever (the leading ATS for SMBs) are approved, enabling automatic ingestion of candidates from these partner platforms.

Major Partner Integrations

Branding, User Research, UX Development
Q3 & Q4 2023

February 2024
Jordan joins as CTO

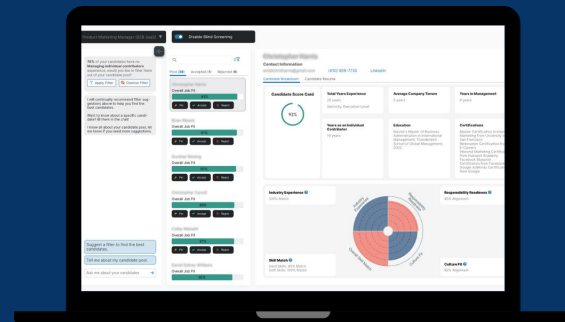

March 2024
MVP V1 Deployed

Google and Microsoft Startup Participants

\$200k in free Infrastructure and GTM Credits for meeting their program qualifications.

June 2024
Open Beta and MVP Public Launch

Our Ask

We're raising a **\$750,000** Seed Round to make key hires, attract our first **100 customers**, and transition from pre-revenue to **revenue**.
