Nick Hertzman

Marketing Director | Uneath

About me:

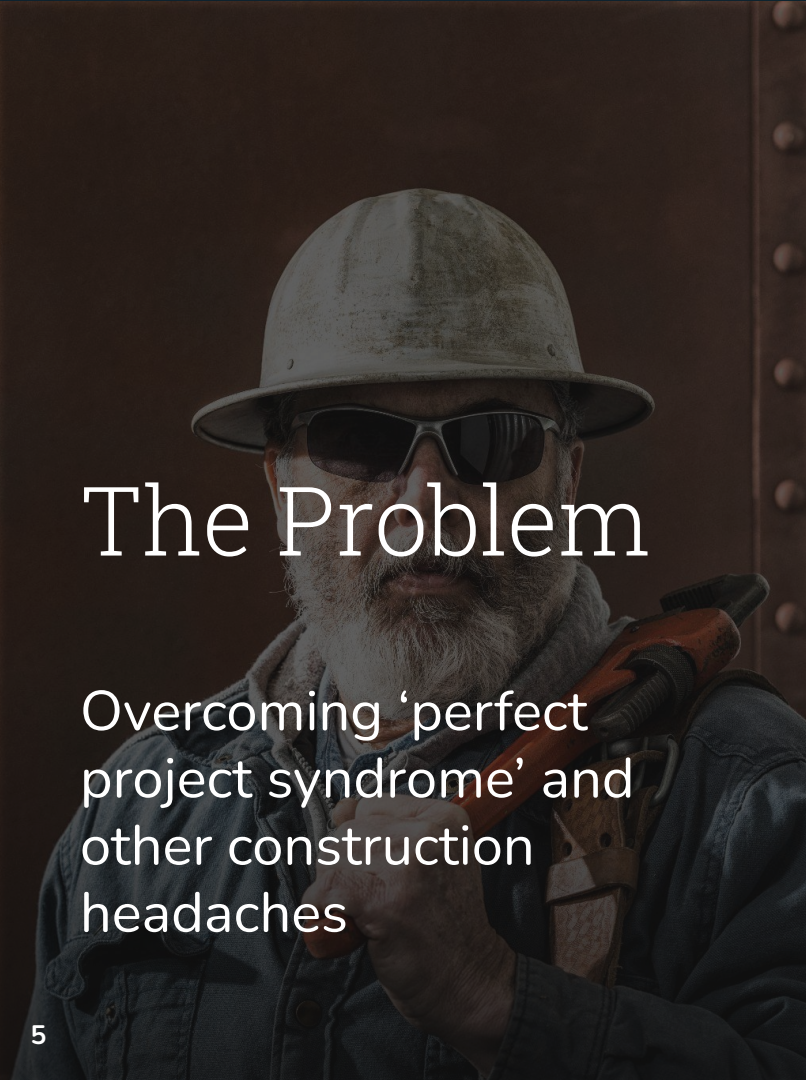

- Marketing Director @ Uneath
- Lead a team of 6 marketers across growth, design, sales enablement, and product marketing
- I've run marketing at Uneath for ~4.5 years, having started as the 6th member of the company.

Agenda

- **The Problem, The Challenge, and The Plan:**
Opening up new markets outside of construction
- **The Execution:** Creating big results with a small team
- **The Results:** Traffic, lead gen, and takeaways

The Problem, The Challenge, and The Plan

Opening up new markets outside of construction

The Problem

Overcoming 'perfect project syndrome' and other construction headaches

Perfect Project Syndrome

Construction customers moved too slow for our growth trajectory

Traction in other Industries

We were finding early traction in industries outside of construction

Misaligned Expectations

Our customers didn't see us as construction software

Lack of Lead Gen Volume

Construction software was a relatively low volume industry

The Challenge

Opening new markets
and gaining traction

Identify a niche

Gather keyword research, search volumes, calculate TAM and SOM, and find the best opportunity

Execute a rebranding campaign with a team of 2

Figure out how to make the most impact in our target market with a small team

Deliver and report on tangible results

Actually generate leads and then report on the results.

The Plan

Rebrand as a 'Simple GIS'
software in 4-6 months

1. **Website Redesign and Rebrand** to build a new foundation.
2. **Content Creation** to drive traffic through PR, blog posts, and long form thought leadership.
3. **2 GIS Microsites** to capture organic search traffic over the long term.
4. **Promotion** to get near term traction while executing on long term vision.

The Execution

Creating big results with a small team

Website Redesign

Website Redesign Overview

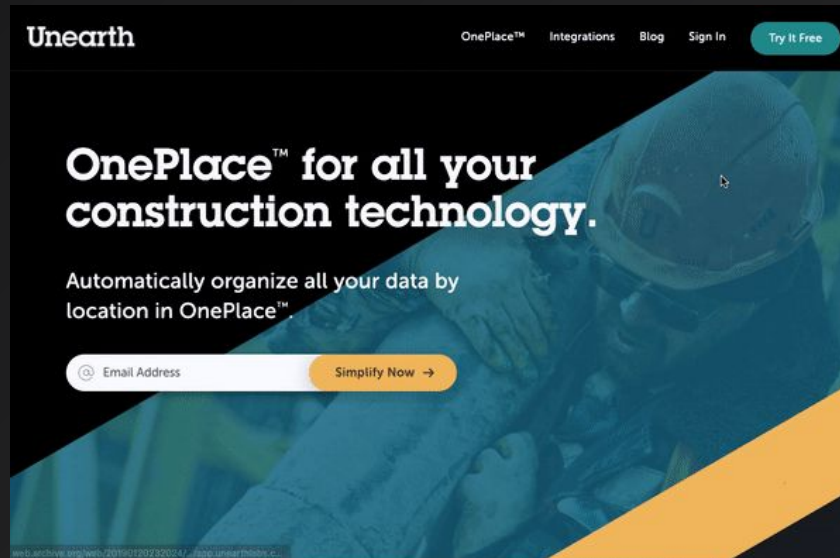

Information Architecture & SEO

- New Top Nav
 - Focus on platform, solutions, and industries over specific features
- Customer focused copy throughout
 - Explaining the problems w/ legacy GIS and breaking down preconceptions of GIS
- Keyword Planning & Research
 - Identified 100+ top terms as SERP targets
- Completely in-house

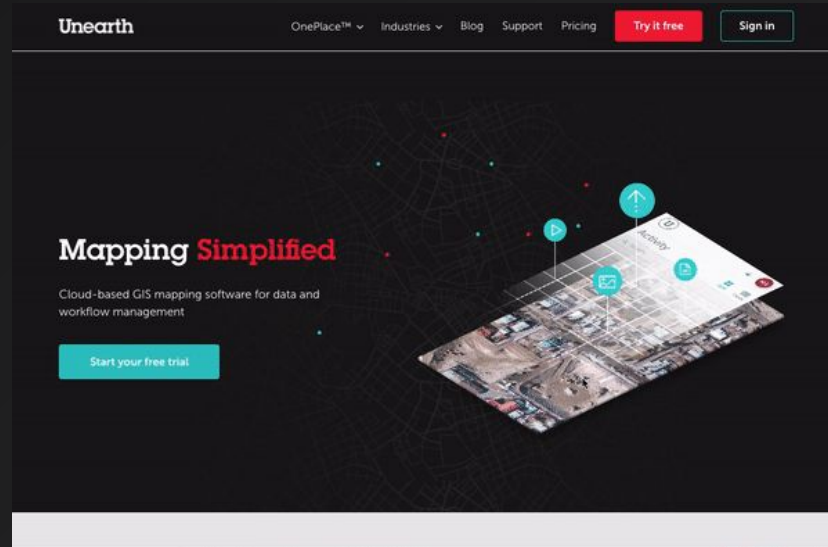

Design, Branding, and Dev

- Ground up redesign of brand
- Focused on vector graphics, map imagery, and simple, modern styling
- Custom static site
 - Simple SCSS framework for building new pages
 - Custom JS integrations to connect directly w/ product
- Out-of-house with 2 hand-picked freelancers
 - 1 designer @ 10 hours/week
 - 1 web developer @ 40 hours/week for ~3 months

Website Redesign Before

Website Redesign After

Content Creation

Content Creation Overview

Weekly Blog Posting

- Capture long-tail search traffic
- Drive user engagement with site for SEO purposes
- Funnel interested leads to GIS create & gate
- In-House

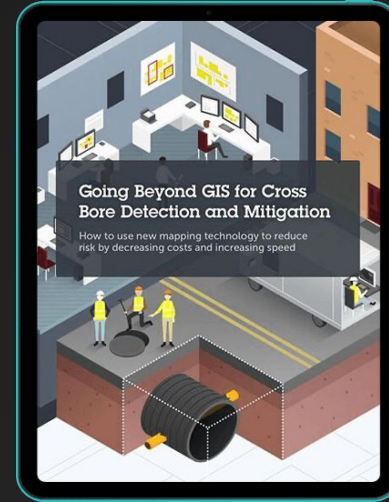

Long Form Thought Leadership

- Capture traffic in Discovery and Awareness phases of funnel
- Enroll new leads in marketing drip campaigns to prime them for demos
- In-House Content | Freelanced Design

PR Campaign

- Press Release announcing Series A
- Embargoed pitches to industry pubs
- Extra form capture for traffic spike
- In-house w/ partnership from investment firms

Content Creation Examples

Microsites

Microsites Overview

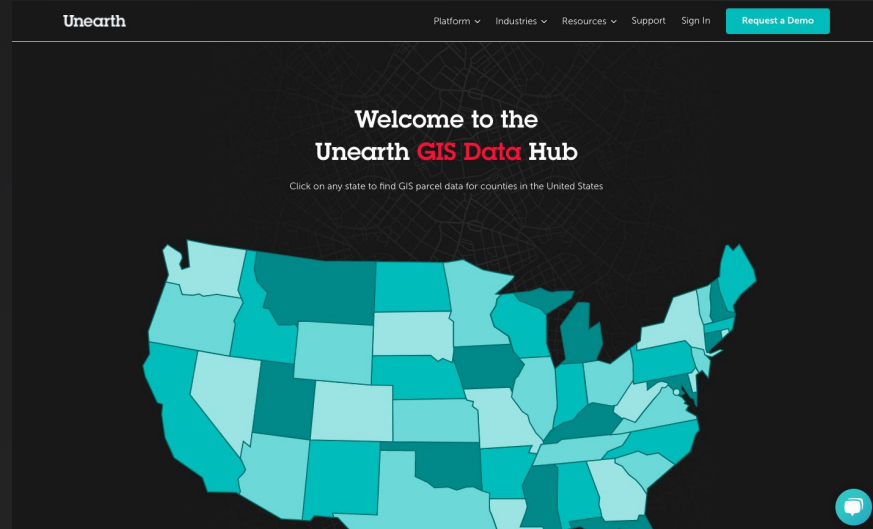

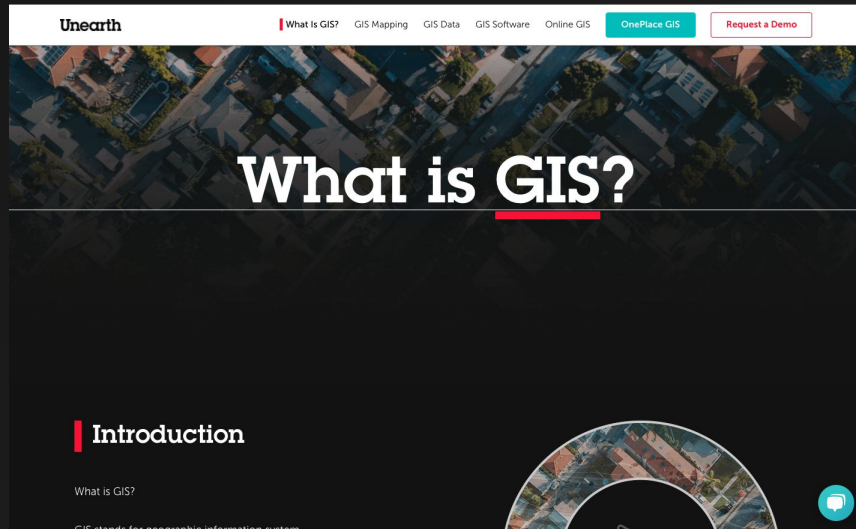

What is GIS

- Capture significant keyword volumes around the basics of GIS and GIS software
- Help educate our customers on the topic of GIS
- Reinforce our positioning as 'Simple GIS' and 'GIS for non-GIS professionals'
- 5 in-depth web pages
- In-house content creation | Freelance design and development

GIS Database

- Capture significant keyword volumes around 'geo' GIS searches
- Engage potential leads who are looking for GIS Data but don't know how to operationalize it
- Set foundation for broader GIS data strategy
- 1 national landing page, 50 individual state pages
- In-house content creation | Freelance design, data collection, and web development

Microsite Examples

Promotion

Promotion Overview

PPC Lead Gen

- Quick, easy lead gen wins around key exploratory markets
- NoFollow, NoIndex landing pages for 5 keyword segments
 - Drones
 - Online Forms
 - GIS
 - Online GIS
 - Utilities
- All in-house

Traditional Cold Outreach

- Identify target markets based on NAICS codes
- Outsource bulk contact harvesting
- Create 4 outbound sequences of 5 emails each to send to 5k+ contacts
 - Drone operator outreach
 - Utility outreach
 - Construction outreach
 - Municipality outreach

Promotion Examples

The Results

Traffic, lead gen, and takeaways

Results vs. Competition - SEMRush

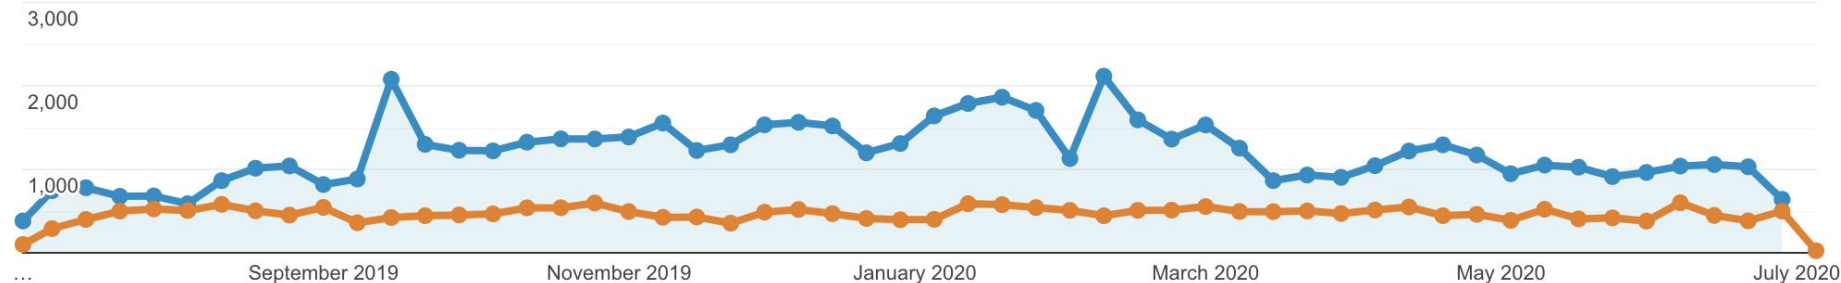

Results vs. Competition - SEMRush

Results Internal - Google Analytics

Jul 1, 2019 - Jul 1, 2020: ● Users

Jun 29, 2018 - Jun 30, 2019: ● Users

Users

160.07%

57,956 vs 22,285

New Users

166.22%

58,390 vs 21,933

Sessions

146.28%

74,112 vs 30,092

Goal Completions

459.34%

5,420 vs 969

Goal Conversion Rate

127.11%

7.31% vs 3.22%

Goal Completions = Form capture through self sign up, create & gate, or demo request

Takeaways

1

Content and SEO
outperformed
expectations

Beating Esri's ArcGIS
for the KWs we care
about was way beyond
what I expected

2

Lead gen worked
great, but we were
too soon

We captured a lot of
sales-ready potential
customers, but our
product wasn't ready
to support them

3

Product wasn't ready
for a transactional
business model

Our product team was too
focused on building
features for a small number
of enterprise customers,
and couldn't field dev time
for transactional requests
